Professional Summary

Final-year Computer Science (Cybersecurity) student with hands-on experience in Python development. Built practical projects in anomaly detection, forensic analysis, and authentication security testing. Strong interest in cybersecurity, backend systems, and AI-driven security solutions.

Skills

Programming: Python, SQL, C++, Java
Networking: IP, DNS, HTTP, Network Monitoring, Packet Analysis
Security Tools: Wireshark, Nmap, Burp Suite, Hydra
Tools & Technologies: GitHub, MySQL, LaTeX, Linux

Projects

TRACE-AI v3.4 – AI Image Detection System

- Built a multi-modal deepfake detection pipeline using ELA, noise, frequency, and compression artifacts.
- Developed a system to detect AI images under social media compression.
- Implemented metadata forensics and a weighted decision engine achieving explainable results.

AI-Based Anomaly Traffic Detection System

- Built a real-time network anomaly detection system using Isolation Forest.
- Processed large-scale traffic data and extracted flow-based features for modeling.

HTTP Basic Auth Testing Utility

- Developed a Python-based utility for testing HTTP Basic Auth security in controlled environments.
- Implemented concurrent credential testing with rate-limiting and proxy support.

Education

St. Joseph's College of Engineering and Technology, Palai B.Tech in Computer Science and Engineering (Cybersecurity) CGPA: 7.9	Oct 2022 – May 2026
Mount Mary Public School (CBSE) Class X – 91.2% Class XII – 85%	Jun 2020 – Mar 2022

Certifications

Cyber Security and Privacy	NPTEL	Oct 2024
Network Analysis Using Wireshark	Infosys Springboard	Jul 2024
Ethical Hacking	Cisco Networking Academy	Oct 2025
Introduction to Packet Tracer	Cisco Networking Academy	Nov 2024

Leadership & Activities

Department Coordinator ASTHRA National Tech Fest, SJ CET	2023
Coordinated and managed departmental activities for a national-level technical festival, overseeing event execution and participant engagement.
